### 課程名稱
**Title of Course**
心理語言學
Psycholinguistics

### 授課教師
**Instructor**
陳麗美
Li-mei Chen

### 開課班級
**Class**
碩博

### 必（選）修
**Required/Elective**
選修
Elective

### 學分數
**No. of Credits**
3/0

### 先修科目
**Prerequisite Course(s)**
無
N/A

### 課程描述
**Course Description**

#### 一、教學內容
Students will gain in-depth understanding on:
1. The cognitive approach and the relationship between language and the processes of brain and mind in adults
2. The biological bases of speech and language perception, processing, production, and acquisition
3. The methods used in psycholinguistic research

#### 二、教學進度
Psycholinguistics incorporates knowledge of linguistics, psychology, computer science and neuroscience. The basic objective of psycholinguistics is to understand how the human mind/brain supports the learning, comprehension and production of language.

Tentative topics covered in this course are:
1. biological basis for language
2. speech perception
3. speech production
4. sentence processing and language comprehension at various levels
5. relation of language and thought
6. atypical language

### 授課方式
**Teaching Approach(es)**
Lecture and Seminar

### 成績考核
**Grading Criteria**
